# Description:

Hydrogenated lecithin is a modified form of lecithin that has undergone hydrogenation, a chemical process that involves adding hydrogen to the molecule. This process alters the properties of lecithin, resulting in a product that has different functional characteristics

SHANKAR is a Global Lecithin and Phospholipids company headquartered in India, founded in 1984.

PRO NATURE. PRO FUTURE is the mission company chose in its new generation and avatar in 21st century. The Company and its people have committed themselves to develop and gain expertise in natural ingredients for Food, Feed, Health and Industrial applications.

All Products we work on have a clear goal of SUSTAINABILITY and HEALTH. Thus, it supports our goal of commitment to Nature and Future. All Our products are derived from by-product/waste of the edible oil refining industry.

SHANKAR Europe is a Shankar India Initiative to provide end to end Lecithin solutions with full commercial and technical support in Europe with a base in Italy. Shankar has the most wide range of Lecithins and Phospholipids products and with this initiative it will bring the best in supply chain for applications of Food, Feed, Health and personal care under brand names of NULEC, INNO-P,A-POLLO
